

Edmond J. Thomas is the Chief of the FCC's Office of Engineering and Technology (OET). Mr. Thomas brings over thirty six years of management experience in engineering and technology to the Commission. He formerly served as the Chief Executive Officer of a UK based subsidiary of Philips Electronics and as CEO of RSLCOM USA. Prior to his tenure at RSL USA, Ed was President of Science and Technology at Bell Atlantic. In this position he was responsible for Bell Atlantic's new products and service development. In this position he also had full operational and P&L responsibilities for Bell Atlantic's large customer data products and services.

For his work in fostering the wireless revolution, in September 2003, Mr. Thomas was honored by being selected by Forbes Magazine as one of the five members of its 2003 E-Gang. In 1998, he was also named by Phone Plus magazine as one of the 50 most influential people in long distance telephony.

He has also served on the academic advisory boards of the University of Colorado, the Polytechnic University and the State University of New York College of Technology. In addition he has served on the Editorial Advisory Board of Network Management Magazine.
