

Biography:

Roger A. Dalke received his Bachelors degree in Physics from the University of Colorado in 1971. He received his MS in 1983 and his Ph.D. in 1986 from the Colorado School of Mines. As a Research Engineer, he has developed numerical techniques for a variety of electromagnetic scattering problems as well as signal processing and imaging methods used in exploration geophysics. More recently has been involved in the development of computer simulation models for digital radio systems and noise and interference measurements and analysis.
