

Peter B. Papazian (M'91) received his B.S. in physics from the State University of New York at Stonybrook in 1973, and his M.Sc. in geophysics from the Colorado School of Mines in 1979. His work experience includes electromagnetic modeling and EMC engineering. In 1990 he joined the Radio Research and Standards group at the Institute for Telecommunication Sciences in Boulder, Colorado. His current research at the Institute concerns millimeter-wave propagation, impulse response measurements for indoor and outdoor radio channels, and man-made radio noise measurement.

Michael G. Cotton received his B.S. in Aerospace Engineering in 1992 and is currently completing his MSc. in Electrical Engineering with an emphasis on Electromagnetics at the University of Colorado at Boulder. In 1992 he joined the Radio Research and Standards group at the Institute for Telecommunication Sciences in Boulder, Colorado. His primary responsibilities for this project is the hardware implementation and software development of the VME-based data acquisition and processing system

Perry F. Wilson received his Ph.D. in Electrical Engineering from the University of Colorado in 1983. He is presently with the Institute for Telecommunications Sciences in Boulder, CO after previous positions with Asea Brown Boveri in Baden, Switzerland and the National Bureau of Standards (now NIST) in Boulder, CO. His interests include electromagnetics as applied to telecommunications and EMC. Dr. Wilson is a Senior Member of the IEEE and a member of URSI Commission B.
