

Magnus Bonnedal, Ph D

Dr Bonnedal was graduated in EE from Chalmers University of Technology, where he also made his Ph D in plasma physics. He joined the Ericsson Radar Electronics in 1979, where he worked with radar and space communication antenna design. He has since 1992 worked at Saab Ericsson Space in 1992 with reflector and array antennas and antenna systems. Over the last years, he has been working as system engineer with broad band satellite communication. He is presently system manager for the GRAS and GPSOS Radio Occultation Receivers being developed at Saab Ericsson Space.
