

**BIOGRAGHPY:**

Mr. Paul J. Oleski has worked for The Air Force Research Lab (AFRL) / Information Grid Division (IFG), located at the Rome Research Site, Rome, NY since 1989.

In 1996 he became the IFG, GBS/MILSTAR Airborne Antenna program manger. This position has included the development of electrically scanned array antennas and mechanically scanned array antennas for aircraft to satellite communications at 20 and 44 GHz.

From 1989-1996, Paul worked in the area of LASER communications under the Ballistic Missile Defense Program.

From 1986- 1989, he was a project engineer for the installation of RF radio systems for the DOD's Digital European Backbone.

Paul received a B.S. in E.E. from Wilkes University in 1986 and a M.S. in E.E. in 1991 from Syracuse University.
